## PROJECTS

### E-Commerce Website – Stannum

A curated e-commerce platform focused on technological needs, offering product recommendations based on budget and usage with an integrated web scraper to collect reviews and provide user with insights.

**Tech Stack:** *React.js, JavaScript, Tailwind CSS, NodeJs, MongoDB, Razorpay API*

### WanderMap

A travel documentation web app that allows users to mark destinations on an interactive map, store travel notes, and manage location data. Designed for a seamless and engaging user experience.

**Tech Stack:** *React.js, JavaScript, CSS*

### Spotify Clone

A web application replicating core Spotify functionalities. Users can log in with their Spotify account to access private playlists, read emails, and explore music features.

**Tech Stack:** *React.js, Styled Components, Spotify API*

### Video Conferencing Website

A real-time communication platform enabling users to conduct video calls, share audio, collaborate with multiple participants, and screen share. Built using the AgoraRTC library for smooth video conferencing.

**Tech Stack:** *HTML, CSS, Bootstrap, JavaScript, AgoraRTC*
